Mini Project 3

Q. 1) Create a MySQl table playlists to store Spotify-style music playlists, with columns: playlist_id (primary key), user_id, name (varchar) and created_at (datetime). Write the CREATE TABLE statement.

Ans. drop table playlists;

create table playlists

(playlist_id int primary key, user_id int , name varchar(255), created_at datetime);

Q. 2) Insert three sample records into the playlists table: one for a user with a 'Workout Mix', one with a 'chill vibes' and one with a 'Top Hits' playlist. Use realistic data for each field.

Ans. insert into playlists

(playlist_id, user_id, name, created_at)

values

(1001, 1, 'Workout Mix', '2026-11-06 15:37:00'),

(1002, 2, 'Chill Vibes', '2026-11-06 15:37:00'),

(1003, 1, 'Top Hits', '2026-11-06 15:37:00');

Q. 3) Write an SQL UPDATE statements to reaname the 'chill vibes' playlists to 'Evening chill' for a specific user_id.

Ans. update playlists set name = 'Evening chill' where name = 'chill vibes' and user_id = 2;

Q. 4) Write a DELETE statement to remove a playlist named 'Workout Mix' for a given user_id from the playlists table. Hint: Make sure your WHERE clause targets only the intended row.

Ans. delete from playlists where name = 'Workout Mix';

Q. 5) Create a stored procedure named GetMonthlyPlaylistCount that takes a user_id and a month (as an integer) a inpu and returns the total number of playlists the user created in that month. Hint: Use the MONTH() function in your WHERE clasuse.

Ans. delimiter $$

create procedure GetMonthlyPlaylistCount(in newuser_id int, month int, out total_count int)

begin

select count(*) into total_count from playlists

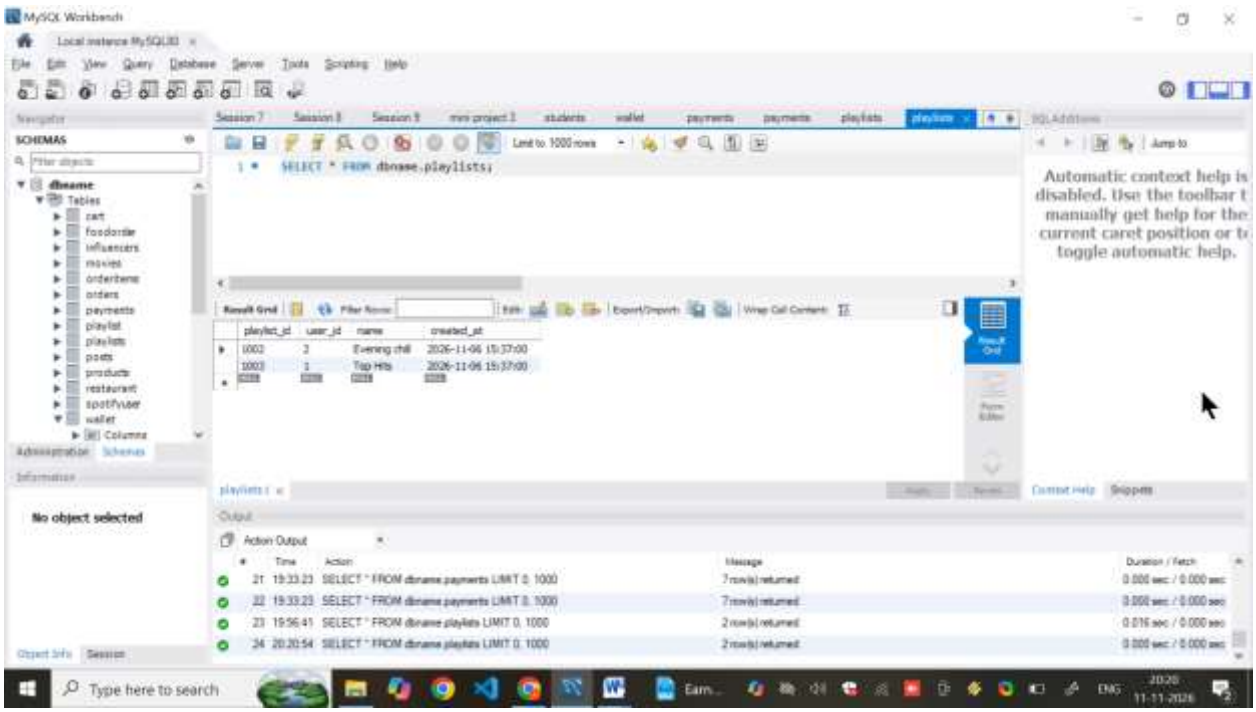

where user_id = newuser_id and month(created_at) = month;

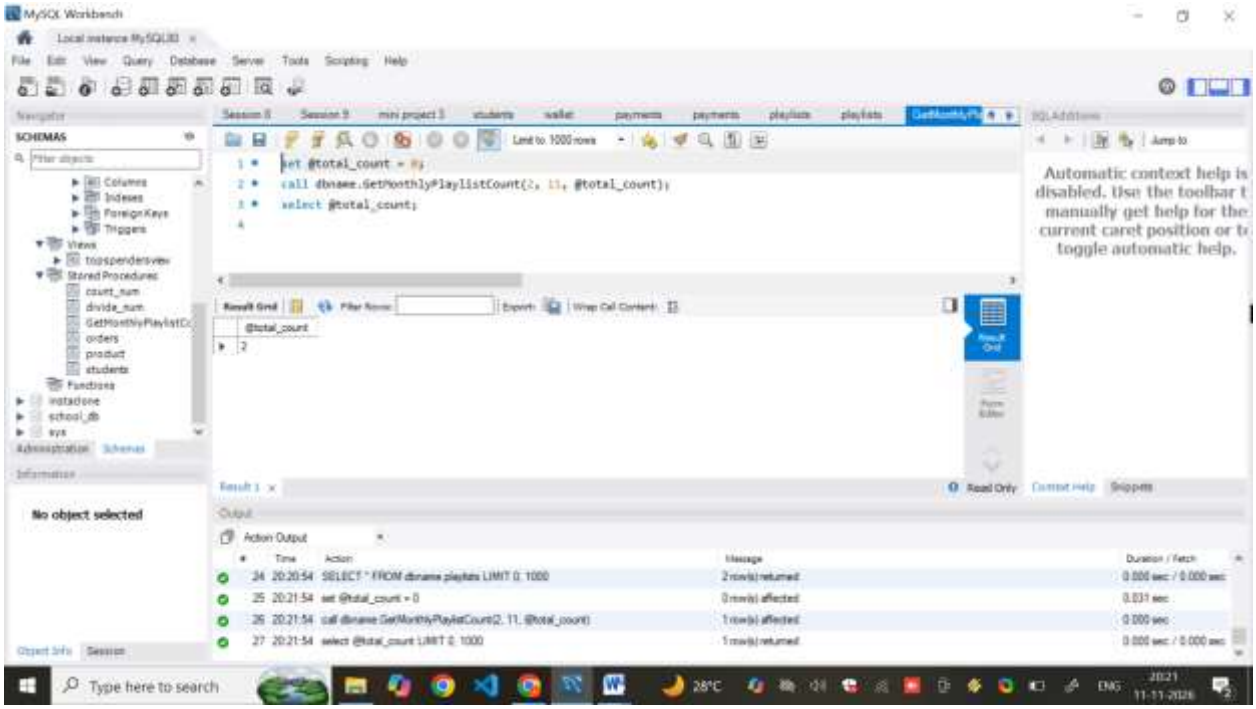

end $$

delimier ;

call GetMonthlyPlaylistCount(2, 11, @total);

select @total as total_playlists;

MySQL Workbench
SCHEMAS
set @total_count = 0;
call dbnaee.GetMonthlyPlaylistCount(2, 11, @total_count);
select @total_count;
@total_count
2
No object selected
Action Output
24 20:20:54 SELECT * FROM dbnaee.playlists LIMIT 0, 1000 2 row(s) returned
25 20:21:54 set @total_count = 0 0 row(s) affected 0.031 sec
26 20:21:54 call dbnaee.GetMonthlyPlaylistCount(2, 11, @total_count) 1 row(s) affected 0.000 sec
27 20:21:54 select @total_count LIMIT 0, 1000 1 row(s) returned
